

Axiomatic Interpretations:

- $S(A, B, l) \iff \nexists X \in l: \mathcal{B}(A, X, B)$
- $\neg S(A, C, l) \implies \exists X \in l: \mathcal{B}(A, X, C)$
- $A, B \in H_{l,A} \implies H_{l,A} = H_{l,B}$
